**MEMORANDUM FOR: Director, Planning, Programming and Budgeting**

John:

I have read the attached draft "Evaluation of CIA [ ] Program [ ]". It is an impressive study. I do, however, have some suggestions for you to consider in the preparation of this evaluation in final form:

a. I don't see any input from the DD/I on the value of the product to national intelligence. Shouldn't he make this contribution?

b. I hope the study group can reach agreement with the Clandestine Services in possible areas for economies. If there are honest differences of opinion, however, we should not water this down to the least common denominator. Let DD/P nonconcur with his reasons therefor if this cannot be avoided.

c. The paper needs a much better Summary of what the program amounts to, what we get out of it, what it costs, and why we should continue it at the present level or increase it or decrease it.

/s/ L. K. White
